

FAST-PASS Visitor Management Solutions

Overview

FAST-PASS® by acre security is a leading electronic identity and visitor management system designed to quickly identify, capture, and log visitors, employees, vendors, and volunteers. It is an essential front-line protection tool for controlling and tracking individuals gaining access to facilities.

FAST-PASS cross-checks criminal, sex offender, and internal watch lists to ensure security and compliance. Once cleared, a photo badge is printed, indicating expiration and destination.

FAST-PASS generates electronic audit trails of all activity for later retrieval to support management and investigative procedures.
