

Video Integrations Overview

Feenics integrates with a number of cloud-based and on-premise video management systems giving customers an additional layer of integration for event response.

Note: Video integration functionality varies. Refer to your acre sales or support contact for specific integration requirements.

Cloud-Based VMS

- OpenEye Open Web Services
- AVA Aware
- Arcules VMS
- Arecontvision Contera WS

Key Features

- ✓ **Cameras** – Imported cameras can be associated with hardware devices for easy accessibility upon alarm
- ✓ **Views** – Create customized live or recorded multi-camera views
- ✓ **Feenics Video Player** – Monitor live and recorded video for alarms
- ✓ **Camera Icons** - Place camera icons on maps for easy access
- ✓ **Video Clips** – Configure pre / post alarm settings
 - Pre-configure acknowledgements for video alarms
 - Attach image for forensic investigations
 - Acknowledgements are stored in Feenics audit trail archives

Significant ROI & Cost Savings

Feenics' subscription-based model means you'll have **no upfront costs to bear**, no computer hardware to purchase, and no software or maintenance contracts to sign.

Always On, Never Out of Date

Software updates are automatic so **your system is always up to date**. No scheduled downtime is ever required.
